

The Pad Interface

The pad interface was designed to simulate a programmer's natural environment as fully as possible, by offering a rich editor and real REPLs.

1. Write code.
- 2a. Invite users to pad.
- 2b. User List
3. Run your code.
4. Title your pad.
5. Change programming language.
- 6a. Access Pad Settings.
- 6b. Pad Settings
- 6c. Editor Settings
7. Clear output.
8. Load question templates.
9. Command line REPL
10. Dismiss candidate from session and make pad private.

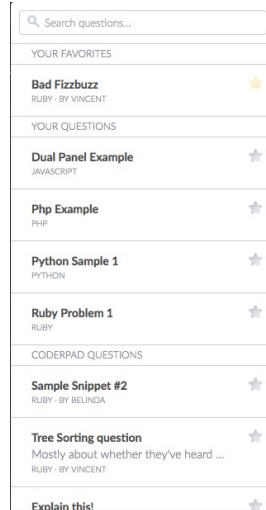

Questions

Questions are a way to save commonly asked interview questions for reuse.

To create a question:

- 1 Click the Questions button.
- 2 Select Write New Question.
- 3 Select the language you would write your question in.
- 4 Fill in the title, description, and contents.
- 5 Click Save.

Welcome to your Question Library

Questions you and your colleagues have written are listed on the left.

You can search for questions you want to use, edit existing questions, and create new ones.

[Write New Question](#)

[Create Question From This Pad](#)

To insert a question:

- 1 Click the Questions button.
- 2 Select the question you'd like to use.
- 3 Choose either "Append to Pad" or "Replace Pad."

Hotkeys

CoderPad has a few hotkeys for making writing code quicker and easier.

On non-OSX computers, please substitute **CTRL** for **⌘**.

Run code **⌘ + ENTER** or **⌘ + S**

To indent one level **TAB** or **⌘ + [**

To indent one fewer level **⌘ +]**

Auto-indent selected text **SHIFT + TAB**

Undo action **⌘ + Z**

Redo action **⌘ + SHIFT + Z**
