

SCREEN EVERY APPLICANT FOR FREE.

Qualify Free Trial Overview

Buried in applications? Run one live requisition through Qualify, free. **Our team builds your custom pre-screen, the AI Reviewer evaluates every applicant, and you get a ranked shortlist** — without adding a single recruiter hour.

Resume review and phone screens cost high-volume teams **\$12K+ per hire** without adding real signal. This offer replaces both on one real req — **built for you, launched with you, free through your trial.**

WHAT'S INCLUDED · FREE ON ONE ACTIVE REQ

Everything below is included at no cost on one active requisition — **built and supported hands-on by the CoderPad team**, from the first call through your final shortlist.

A pre-screen built for your req

CoderPad builds your custom screen — video, text, or multiple-choice — mapped to your job description and criteria.

AI Reviewer on every applicant

Every candidate answers the same questions and is scored against the same rubric. No one falls through the cracks.

A ranked, defensible shortlist

Candidates are auto-bucketed into Strong, Review, and Screen Out — with a documented reason behind every score.

Zero scheduling, zero added hours

Candidates complete the screen on their own time. The review happens automatically — your team just makes the call.
